WORKING EXPERIENCE

Web Developer | Full-Time

TradingPro International Ltd, Cyberjaya · August 2024 - Present

- Designed mockups and wireframes to plan clean, user-focused interfaces.
- Developed responsive, dynamic web interfaces using multiple frameworks, technologies, and tools.
- Built cross-browser and mobile-friendly layouts to ensure consistent performance across all devices.
- Implemented interactive features to enhance user experience and engagement.
- Tested and debugged applications to identify and resolve issues efficiently.
- Collaborated with designers, back-end developers, and project managers throughout the development lifecycle.
- Integrated front-end components with server-side logic for seamless functionality.
- Participated in code reviews and contributed to maintaining clean, scalable codebases.

Personnel MyStep as Application Developer | Full-Time

Kementerian Kesihatan Malaysia, Putrajaya · January 2024 - July 2024

- Developed dynamic web-based applications using the Laravel PHP framework.
- Designed and implemented responsive user interfaces with frameworks.
- Translated technical and design requirements into scalable and functional web features.
- Conducted thorough UI and back-end testing to ensure optimal performance and reliability.
- Collaborated with senior developers to integrate front-end components with server-side logic seamlessly.

Junior Front-End Developer | Part-Time

Laskar Technologies, Ara Damansara · January 2022 - October 2023

Contributed to the iCerdik Learning Management System project by leading the design and implementation of the web application interface, overseeing key front-end development tasks and engineering activities.

Highlights:

Web Design

- Created and sketched wireframes and prototypes to conceptualize website layout and functionality prior to development.
- Translated concepts into visually structured and user-friendly interface plans.
- Tools & Technology: Draw.io, Eraser.io, Figma
